AFTER TREATMENT

Intravitreal injection aftercare

Dr Travers Weaver · Cataract & Vitreoretinal Surgeon · FRANZCO

- Use any drops exactly as prescribed
- Avoid rubbing the eye today
- Avoid swimming, spas and dusty places for 48 hours
- A gritty, irritated eye, a red patch or new floaters are common and settle
- Drive the next day once vision is comfortable

Call us: Same-day review for sudden vision loss, increasing pain, marked redness or increasing floaters.
