POST-OPERATIVE

Pterygium surgery aftercare

Dr Travers Weaver · Cataract & Vitreoretinal Surgeon · FRANZCO

- The eye pad is usually removed the next day
- Use drops as prescribed, often for several weeks
- Grittiness and redness for 1–2 weeks are normal
- Do not rub the eye; avoid swimming and dusty places for 2 weeks
- Wear sunglasses outdoors to help prevent regrowth

Call us: Same-day review for severe pain, discharge, reduced vision or if the graft looks displaced.
