POST-OPERATIVE

Vitrectomy & retinal surgery aftercare

Dr Travers Weaver · Cataract & Vitreoretinal Surgeon · FRANZCO

- Your first check is the day after surgery
- Posture exactly as instructed if you have a gas bubble
- No flying, high altitude or nitrous oxide while gas is present
- Use drops as prescribed, usually for about 4 weeks
- Wear the eye shield at night for 1 week
- Avoid heavy lifting, strenuous exercise and swimming for 2 weeks
- No driving until Dr Weaver confirms your vision is adequate

Call us: Same-day review for increasing pain, worsening vision, a new shadow or marked redness.
